

ContainerPower Energy Solutions

New Energy Battery Small Container

CE UN38.3 

Overview

What is a containerized battery energy storage system?

Provide users with a peak-valley electricity price arbitrage mode and stable power quality management. Shipped in a 20ft container, Sunwoda's containerized battery energy storage system (BESS) is an all-in-one energy storage solution for various scenarios.

Are energy storage containers a viable alternative to traditional energy solutions?

These energy storage containers often lower capital costs and operational expenses, making them a viable economic alternative to traditional energy solutions. The modular nature of containerized systems often results in lower installation and maintenance costs compared to traditional setups.

What is container energy storage?

Our container energy storage optimizes distribution, seamlessly integrates renewables, and eases grid strain. From factories to remote areas, we deliver consistent power, advancing sustainability. As dedicated partners, we redefine energy access, steering towards a brighter, greener future. Join us in shaping tomorrow's energy landscape.

Why should you choose a container energy storage system?

Safety is paramount in our container energy storage systems. Through advanced multilevel safety protocols, we guarantee the security of your energy investments, prioritizing user safety, system integrity, and peace of mind. Prepare for the unexpected with our container energy storage's black start capability.

What is a battery energy storage system (BESS)?

The amount of renewable energy capacity added to energy systems around the world grew by 50% in 2023, reaching almost 510 gigawatts. In this rapidly

evolving landscape, Battery Energy Storage Systems (BESS) have emerged as a pivotal technology, offering a reliable solution for storing energy and ensuring its availability when needed.

What is a 20 ft container?

20ft container with energy over 4MWh and battery life extended more than 20% Using a standard 20-foot container, high energy density, small size, and convenient transportation Support plug-and-play combination of two containers, flexibly suitable for the application of large energy storage power stations.
