# New smart inverter price

## Overview

---

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

How much does a solar inverter cost?

The cost varies based on type and capacity, ranging from \$500 to \$10,000+.

2. Which solar inverter is best for home use?

Fronius Primo, SMA Sunny Boy, and Enphase IQ 7A are among the best options.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

Why are smart inverters more expensive?

More efficient inverters tend to be slightly more expensive but provide better energy output. Additionally, the introduction of AI-driven smart inverters and IoT-based monitoring systems is contributing to higher costs while offering advanced energy management.

2. Manufacturing & Supply Chain.

Do hybrid inverters cost more than a solar inverter?

It's worth noting that hybrid inverters used for battery storage generally cost 20 to 40% more than the equivalent size solar inverter due to the additional battery controls and energy monitoring. However, the price difference is

declining as manufacturers utilise common components across the inverter range.

How much does a string inverter cost?

String inverters cost \$800 to \$2,500 on average. Most homes only require a single inverter, but you could need up to three if you have a larger-than-average residential solar energy system. String inverters work by connecting several solar panels, which send their electricity to a central point where the inverter converts the power.
