# Northern Cyprus Power Plant Energy Storage Project

## Overview

---

The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of Cyprus (EAC) power plants, by June 2026, Government Spokesperson Konstantinos Letymbiotis said Monday.

The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of Cyprus (EAC) power plants, by June 2026, Government Spokesperson Konstantinos Letymbiotis said Monday.

Cyprus is set to expand its energy infrastructure with new storage facilities and power generators, Giorgos Petrou, president of the Cyprus energy regulatory authority (Cera) confirmed on Wednesday. According to a report on StockWatch, Petrou revealed that an additional proposal is under review for.

For years, Northern Cyprus has danced this frustrating tango with unreliable energy grids. But here's the twist: The region is now leading a power storage revolution that's turning blackouts into bedtime stories. Let's unpack how battery tech and smart grids are rewriting the island's energy.

Cyprus aims to complete energy storage system by 2026, launch competitive electricity market in 2025, KNEWS CLOSE Loading. TRENDING CyprusGreeceTurkeyterrorismtourismvaccine GREEK EDITION Pharmacies Home 12°Nicosia, 19 October, 2025 NEWS BUSINESS LIFE COMMENT OPINION OUT&ABOUT VIDEOS NEWS.

Therefore, this study aims to specify the best regions in Northern Cyprus to install PV power plants where construction and operation. The application of information technology (IT) offers a method to automate and ensure the timely and effective capture, processing and distribution of key nuclear.

With solar irradiation levels hitting 1,750 kWh/m<sup>2</sup> annually sunlight intensity that rivals California's Central Valley, Northern Cyprus should be leading Mediterranean renewable adoption. Yet the region currently imports 92% of its electricity from oil-fired generators – an unstable arrangement.

The planned battery storage infrastructure, to be installed between 2026 and 2030, will have a total capacity of 160 megawatts with the capability to store renewable energy for 2-3 hours, Papanastasiou told the House Energy Committee. The flywheel energy storage power plants are in containers on.
