

ContainerPower Energy Solutions

Norwegian container energy storage company

Overview

Some of the leading energy storage companies in Norway include Equinor, Statkraft, and NEL Hydrogen. Where is Northern Lights CO₂ stored?

The Norwegian Minister of Energy officially opened the Northern Lights CO₂ transport and storage facility in Øygarden, near Bergen, Norway. The Northern Lights facility is a joint venture between Equinor, Shell, and TotalEnergies. With the opening, Equinor's cross-border facility is ready to receive and store CO₂.

Does Northern Lights offer CO₂ transport & storage as a service?

Northern Lights offers CO₂ transport and storage as a service. Our mission is to enable the reduction and removal of industrial emissions in Europe. CCS is a necessary solution to decarbonise industry and reach net zero goals.

What is the first phase of Northern Lights' CO₂ transport & storage project?

The first phase development of the project is the transport and storage component of Longship, the Norwegian Government's full-scale carbon capture and storage project. We have completed the first phase of Northern Lights' CO₂ transport and storage infrastructure, with an initial capacity of 1.5 million tonnes per year.
