

ContainerPower Energy Solutions

Norwegian energy storage lithium battery agent

DISTRIBUTED PV GENERATION + ESS

Overview

Are batteries a potential green industry in Norway?

McKinsey & Co. has identified batteries as one of Norway's principal potential green industries in the future. According to the consultancy, a rapid and broad strengthening of all parts of the battery value chain is needed to satisfy the global battery shortage.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

Why is Norway a leader in battery manufacturing?

As a pioneer in the clean energy sector, Norway has also shown strength in battery manufacturing. As the global demand for sustainable energy solutions grows, Norwegian battery manufacturers are at the forefront of this change.

What is battery Norway?

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU's battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

How can Norway become a leader in sustainable batteries?

Investing in research, local manufacturing and secure access to materials is needed to solidify Norway's position as a leader in sustainable batteries. Battery technology is essential to meet Europe and Norway's zero emission targets by 2050, helping to reduce carbon emissions in the energy and

transport sectors across the continent.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.
