Overview

What are the different types of energy storage technologies?

This report covers the following energy storage technologies: lithium-ion batteries, lead-acid batteries, pumped-storage hydropower, compressed-air energy storage, redox flow batteries, hydrogen, building thermal energy storage, and select long-duration energy storage technologies.

Can stationary energy storage improve grid reliability?

Although once considered the missing link for high levels of grid-tied renewable electricity, stationary energy storage is no longer seen as a barrier, but rather a real opportunity to identify the most cost-effective technologies for increasing grid reliability, resilience, and demand management.

What is long-duration energy storage (LDEs)?

Long-duration energy storage (LDES) is one example of an emerging market included in this report. Below is a high-level description of LDES that portrays its evolving profile and opportunity to fill an important storage need. As renewable content on the grid increases, the duration of storage needed to provide reliability also increases.

What is the growth rate of industrial energy storage?

The majority of the growth is due to forklifts (8% CAGR). UPS and data centers show moderate growth (4% CAGR) and telecom backup battery demand shows the lowest growth level (2% CAGR) through 2030. Figure 8. Projected global industrial energy storage deployments by application.

What is the energy storage Grand Challenge?

This report, supported by the U.S. Department of Energy's Energy Storage Grand Challenge, summarizes current status and market projections for the global deployment of selected energy storage technologies in the transportation and stationary markets.

What is the relationship between renewable content and storage duration?

As renewable content on the grid increases, the duration of storage needed to provide reliability also increases. The relationship between the grid renewable content and storage duration is complex and dependent on the details of the particular use scenario.
