Portugal dedicated energy storage battery

Overview

Government outlines €400 million plan to strengthen grid resilience after April blackout. Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader €400 million package aimed at improving grid reliability and preventing.

Investors are shifting from a race to install ever-larger solar fields toward a more nuanced goal: pairing panels and turbines with industrial-scale batteries so the lights stay on when the sun and wind take a break. For newcomers to the country, this change could influence everything from future.

A Portuguese project to build a lithium battery factory is among 61 selected by the European Commission for funding to reduce carbon dioxide (CO2) emissions, it was announced today. In total, the EU executive is providing funding of €2.9 billion for 61 “cutting-edge, zero-impact technology.

Portugal will invest \$480 M (€400 M) to strengthen grid stability and scale battery storage, aiming for 750 MW of BESS capacity after Iberian blackout. Portugal: Portugal has unveiled a \$480 M (€400 M) investment package to modernise its electricity grid and significantly expand battery energy.
