

ContainerPower Energy Solutions

Private network base station converged communication platform

Overview

What is a converged services platform?

The platform facilitates simple service delivery from next-generation mobile, IP, and IP Multimedia Subsystem (IMS) core networks to legacy mobile networks or new SIP-enabled devices. This converged services platform can also: Interface with SIP, voice over IP (VoIP), IMS, and mobile broadband IP access networks, including Long Term Evolution (LTE).

What is cloud-native 4G/5G converged core?

Cloud-native 4G/5G Converged Core will help you seamlessly migrate from your legacy 4G network to 5G network, bringing both your 4G and 5G users together under a single core.

What is Cisco converged services platform?

Interoperability with leading partners using open-standard interfaces High-availability to promote subscriber satisfaction and 99.999 percent system availability Cisco Converged Services Platform helps existing and new services work with different-generation access and core network technologies.

What is NEC 4G 5G converged core?

And built on open-source technology, it's designed to evolve as your network evolves. The NEC cloud-native 4G/5G Converged Core portfolio features a full set of 3GPP compliant network functions for both 5G and 4G. Fully virtualized and containerized, it offers three tiers of microservice architecture.

What is a converged messaging service?

Converged messaging services, including a comprehensive communications suite Code Division Multiple Access (CDMA) femtocell service convergence Interoperability with leading partners using open-standard interfaces High-availability to promote subscriber satisfaction and 99.999 percent system availability.

What converged services can CSFB IWF support?

This converged services platform can also: Interface with SIP, voice over IP (VoIP), IMS, and mobile broadband IP access networks, including Long Term Evolution (LTE) Reduce Circuit Switched legacy equipment upgrade costs when deploying V2oLTE with the Circuit Switched Fall Back Interworking Function (CSFB IWF)
