

ContainerPower Energy Solutions

Replacement of liquid-cooled energy storage battery cabinet

Overview

The MEGATRONS 373kWh Battery Energy Storage Solution is an ideal solution for medium to large scale energy storage projects. Utilizing Tier 1 LFP battery cells, each battery cabinet is designed for an install friendly plug-and-play commissioning with easier maintenance capabilities.

The MEGATRONS 373kWh Battery Energy Storage Solution is an ideal solution for medium to large scale energy storage projects. Utilizing Tier 1 LFP battery cells, each battery cabinet is designed for an install friendly plug-and-play commissioning with easier maintenance capabilities.

MEGATRON 1500V 344kWh liquid-cooled and 340kWh air cooled energy storage battery cabinets are an integrated high energy density, long lasting, battery energy storage system. Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS).

AceOn's eFlex 836kWh Liquid-Cooling ESS offers a breakthrough in cost efficiency. Thanks to its high energy density design, eFlex maximizes the energy stored per unit of space, drastically reducing land and construction costs. Besides, eFlex delivers unmatched flexibility with its modular design.

GSL ENERGY's All-in-One Liquid-Cooled Energy Storage Systems offer advanced thermal management and compact integration for commercial and industrial applications. Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection.

Liquid Cooling Technology offers a far more effective and precise method of thermal management. By circulating a specialized coolant through channels integrated within or around the battery modules, it can absorb and dissipate heat much more efficiently than air. This method ensures a more uniform.

Individual pricing for large scale projects and wholesale demands is available. Equipped with an independent liquid cooling system, it achieves higher energy density and enhanced heat dissipation within a compact footprint, while

offering advantages such as high efficiency, low noise, safety.

What type of solution does your business need?

Email for contact only; privacy strictly protected. Oregon (SY)Amperex offers high-capacity liquid cooled energy storage systems ideal for industrial and commercial applications. With 30+ years of battery innovation, we deliver reliable.
