Romania energy storage solar power generation

Overview

What does Romania want from energy storage projects?

Romania wants mature projects that can be implemented quickly and that can help balance the system, he was quoted as saying. Romania has allocated EUR 80 million under its National Recovery and Resilience Plan (PNRR) for energy storage projects, which is expected to result in contracts for a total of 1.8 GW of capacity, according to Burduja.

How much money is earmarked for energy storage projects in Romania?

Romania has earmarked EUR 380 million to support energy storage projects. A further EUR 300 million has been earmarked in the Modernization Fund, EUR 150 million each for this year and next, which will mean at least 3 GW of new energy storage capacity, he said.

How much energy will Romania have in 2025?

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, citing Minister of Energy Sebastian Burduja.

How to develop a solar plant project in Romania?

The first step in developing a solar plant project in Romania is to secure a title over the land. The most common title, besides the ownership title, which gives right to build and own the respective infrastructure for a solar plant project, is the superficies right.

What is Romania's largest battery storage system?

In April, Romania's largest battery storage system, of 24 MWh, was put into operation. It is the first phase of a project totaling 216 MWh. The facility is connected to the Mireasa wind farm of 50 MW, while a 35 MW solar power plant is expected to be added by the end of 2024. Be the first one to comment on this article.

Is Res market development in Romania supported by the authorities?

Also, the newly adopted hydrogen strategy as well as the announced offshore wind legislation provided additional signals that the RES market development in Romania is strongly supported by the authorities.
