Romania makes energy storage equipment

Overview

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list includes big names such as Verbund, Engie R.Power, Hidroelectrica.

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list includes big names such as Verbund, Engie R.Power, Hidroelectrica.

More and more large companies are announcing investments in batteries, storage is on its way to becoming a pillar of the country's new energy system
In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or.

The Romanian Ministry of Energy has announced a new round of funding from the Modernization Fund dedicated to battery energy storage systems. Romania has launched a new non-refundable funding program for battery energy storage systems to the tune of EUR 150 million (\$158 million), this time.

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names. Recent updates about investments in battery energy storage.

Romania's Ministry of Energy has announced a €150 million funding program aimed at promoting the development of battery energy storage systems (BESS) across the country. The program, which will be financed through the Modernization Fund, is specifically targeting standalone storage facilities.

Greenvolt Next has successfully completed its first photovoltaic (PV) plant with integrated energy storage for the Romanian company, Elmas, in Braşov. This

landmark 1.4 MWp project is paired with a 1 MWh energy storage system, designed to provide the company with energy independence through.

Bucharest, July 22, 2025 – Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania. The installation, which will be built in Florești, Cluj County, will have a capacity of 200 MW / 400 MWh and is.
