

ContainerPower Energy Solutions

Senegal makes outdoor power supplies

All In One

Integrating battery packs

Intelligent Integration

integrated photovoltaic storage cabinet

High-capacity

50-500kWh

Rated AC Power

50-100kW

Degree of Protection

IP54

Altitude

3000m(>3000m derating)

Operating Temperature Range

-20~60°C(Derating above 50 °C)

Overview

The OMVS power system is made up of a system of Senegal River dams, the Manantali (200 MW) and Felou (60 MW) hydroelectric plants, and a 1,000-kilometer system of 225 kv transmission lines and sub-stations. Who buys electricity in Senegal?

Senelec, the sole buyer, signs power purchase contracts with independent power producers (IPPs). The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel. The rest is mostly coal and hydroelectricity.

How does Senegal support regional energy cooperation?

Senegal supports regional energy cooperation as a member of the West African Power Pool (WAPP) and is a member of regional organizations to develop hydroelectricity resources on the Senegal (OMVS – Senegal River Basin Development Organization) and Gambia (OMVG – Gambia River Basin Development Organization) rivers.

How will Senegal diversify its energy mix?

The Government of Senegal is committed to diversifying its energy mix by adding solar and increasing wind to the grid. While awaiting first gas in 2023, the government hopes to import LNG as a bridging measure and convert all current HFO plants to gas-to-power plants.

How much does electricity cost in Senegal?

Due to dependence on expensive liquid fuels for 90 percent of power generation, Senegal has some of the highest generation costs in Africa. While electricity generation costs range from 34 to 38 cents per kilowatt hour, consumers pay roughly 24 cents per kilowatt hour with the difference covered by government subsidies.

How many MW of electricity does Senegal have?

Phase One's 16 turbines began supplying 50 MW of electricity to Senegal's grid in December 2019, while additional phases since July 2021 add 108 MW, increasing the country's electricity supply by 15 percent.

Is Senegal a power Africa focus country?

Senegal is a Power Africa focus country. Power Africa is a market-driven, U.S. government-led public-private partnership aiming to double access to electricity in Africa. It offers private sector entities tools and resources to facilitate doing business in Africa's power sector.
