Solar 6V Water Pump Inverter

Overview

What is a solar pump inverter?

A solar pump inverter converts the DC electricity from solar panels into AC power to drive water pumps. It also controls pump operation based on sunlight intensity, enhancing energy efficiency and ensuring consistent water output — especially vital for agriculture and remote drinking water systems. [How to Determine Your Pumping Requirements?](#)

.

What is the new solar water pump inverter Sp100 series?

After years of deep cultivation and exploration in the solar water pump industry, INVT has carefully developed a new solar water pump inverter: SP100 series. SP100 has comprehensively upgraded the usability, functionality, and performance of its existing solar water pump products.

How to choose a solar pump inverter?

Understand the rated power of the water pump. Normally, the rated power of the solar pump inverter should be slightly more than or equal to the rated power of the water pump to ensure that the pump can be operated normally. For instance, if the water pump's rated power is 2kW, the selected inverter should have a rated power of 2kW or higher.

Can a solar pump inverter damage your irrigation system?

Solar-powered water pumping systems are revolutionizing irrigation and water supply in remote areas. But choosing the wrong inverter can reduce efficiency or even damage your system. This guide walks you through everything you need to know in 2025 to select the ideal solar pump inverter for reliable, cost-effective performance.

Can a solar inverter drive a water pump?

Let's explore them. Three solar inverters can drive a water pump and convert photovoltaic direct current into alternating current. It is an inverter designed for running water pumps using solar power. It directly transforms the direct power produced by solar panels into an alternating current to drive the pump.

What is veichi SI series solar water pump inverter?

VEICHI SI series solar water pump inverter is a high-efficiency solar water pump controller which can make full use of solar energy to drive water pumps for agricultural irrigation, water supply system, fountains, ground water lowering and etc.
