Solar Wattage and Price

Overview

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below).

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below).

NOTE: Under the “One Big Beautiful Bill Act” signed in July 2025, the federal solar tax credit is now set to expire at the end of the year, much earlier than previously expected. You must install and pay for your system by Dec. 31, 2025, to receive the 30% tax credit. People with solar panels can.

With utility rates rising and the 30% solar tax credit going away at the end of the year, installing solar in 2025 offers more cost-savings potential than ever before. So, what’s standing in the way of American homeowners and solar panels?

The biggest hurdle is often the perceived “upfront cost” of.

Historic Low Pricing: Solar costs have reached unprecedented lows in 2025, with systems ranging from \$2.50-\$3.50 per watt installed, making the technology more accessible than ever before. Federal Tax Credit Urgency: With Congress proposing to end the 30% federal tax credit after 2025, homeowners.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

This guide explains the costs involved in going solar, factors that affect pricing, and how to decide if solar panels are the right choice for you. How much you pay to go solar will depend on six factors, including your electricity usage, how many solar panels you install, the incentives you use.

In this guide, we'll break down average solar costs per square foot in 2025, show how they compare by home size, explain why this metric has limits, and give you expert tips to reduce your price. Average U.S. solar cost per square foot in 2025: \$6 – \$12 after the 30% federal tax credit. Cost per.
