Post-sanctions Syria eyes energy shift, and inks MoU for 200 MW solar and storage projects. (Illustrative Photo; Photo Credit: ZHMURCHAK/Shutterstock.com) Syria's Ministry of Energy has signed a memorandum of understanding (MoU) with US-based 20Solar Energy to develop 200 MW solar PV capacity, as.

Syria's new photovoltaic power station would be built outside Damascus [Getty] Syria's ministry of electricity has announced a new 100-megawatt photovoltaic power station to be built to tackle the nation's energy crisis, following over a decade of unrest and economic uncertainty in the country. The.

This report was produced as part of the second round of Al-Jumhuriya's Grant Program for Syrian Women Journalists, which supports the production of in-depth journalistic projects related to topics of public interest in Syria or Syrian diaspora communities. The editor supervising this report was our.

The Syrian Ministry of Electricity has announced the construction of a 100-megawatt solar power station in the Damascus countryside, signaling a major step towards expanding the country's renewable energy capacity. The project is part of Syria's broader strategy to diversify its energy sources and.

The rapid adoption of solar power in northeast Syria, in areas controlled by the Democratic Autonomous Administration of North and East Syria (AANES), has been driven by severe electricity shortages, rising fuel costs, and prolonged drought conditions. With only 160 megawatts of power available to.

That's Syria's reality in 2025—its power generation capacity plummeted 70% since 2010 due to war and sanctions. Hospitals ration life-saving equipment operation, while factories operate at 30% capacity. The economic cost?

Over \$5 billion annually in lost productivity according to 2024 World Bank.
