# Solar panels in rural Italy

## Overview

---

In 2024, Italy's government implemented significant restrictions on solar photovoltaic (PV) installations on agricultural land through the Agricultural Law Decree. The Law Decree was converted into Law no. 101 and published in Official Gazette no. 163 of 13 July 2024.

In 2024, Italy's government implemented significant restrictions on solar photovoltaic (PV) installations on agricultural land through the Agricultural Law Decree. The Law Decree was converted into Law no. 101 and published in Official Gazette no. 163 of 13 July 2024.

ic systems in Italy, with a focus on their structural integration into sustainable land use and rural energy policy. Distinct from conventional ground-mounted photovoltaics, these systems support the simultaneous performance of agricultural and energy-producing functions. The study examines recent.

A draft decree identifying areas suitable for the installation of PV systems in Italy (implementing the provisions of Article 20 (1) and (2) of Legislative Decree no. 199/2021) has shown that the government clearly prioritises the installation of agrivoltaic systems on agricultural land over PV.

The Italian government has issued a new decree to completely ban solar from agricultural land. The new provisions will not apply to projects currently undergoing the approval process. From pv magazine Italy The Italian government has issued a new decree that prohibits the deployment of large-scale.

Solar panels have become a popular and reliable energy solution in Italy, offering homeowners the opportunity to significantly reduce energy costs while contributing to a more sustainable future. In 2025, the solar energy market in Italy continues to grow, with greater affordability, efficiency.

With its rich agricultural heritage and strong commitment to renewable energy, Italy is an ideal candidate for advancing agricultural photovoltaic interconnection projects. This approach not only meets Italy's energy needs, but also ensures that the land is used for both agricultural production and.

In 2024, Italy's government implemented significant restrictions on solar photovoltaic (PV) installations on agricultural land through the Agricultural Law Decree. The Law Decree was converted into Law no. 101 and published in Official Gazette no. 163 of 13 July 2024. This law marks a pivotal shift.
