Syria Energy Storage Chemical Power Plant

Overview

What is the outlook for Syria's Energy Resources & Infrastructure?

A quick outlook regarding Syria's energy resources and infrastructure, including the role of declining oil revenue under the Assad regime's governance and the prospects for, and geopolitical impact of, Syrian energy production and trade in a new era.

How much electricity does Syria use a year?

Prior to the outbreak of the civil war, Syria generated close to 29.5 billion kilowatt hours of electricity annually, while its consumption was 25.7 billion kilowatts. 18 The bulk of this came from thermal power plants fueled by oil and natural gas. The Tishrin hydropower plant in the Aleppo district provided 4 percent of Syria's electricity. 6.

How much natural gas does Syria have?

Natural gas In 2015, the EIA estimated Syria's natural gas reserves at 240 billion cubic meters (BCM). Syria possesses both wet and dry gas. Syria's natural gas is used for power production and is needed for reinjection into Syria's oil fields.

Will Syria increase its oil and natural gas volumes?

Syria has significant potential to increase its oil and natural gas volumes. Syria can also serve as a transit state for natural gas from Israel and other producers in the Eastern Mediterranean to Turkey and onward to Europe. Turkey will play a major role in Syria's reemerging energy sector.

Where are Syria's oil and natural gas fields located?

Most of Syria's oil and natural gas fields are located in the eastern part of the country. As of publication, the YPG controlled the bulk of the fields in northeast Syria. Control of these fields is a major factor in the new regime's efforts to establish its full authority in Syria.

Does Syria have oil & gas in its EEZ?

Syria has not explored for oil and natural gas in its EEZ, though legal preparations to commence exploration were under way prior to the war. Like its neighbors in the Eastern Mediterranean, Syria is likely to discover oil and gas resources in its EEZ.
