Total investment in UK energy storage projects

Overview

Two leading UK-based energy firms, AMP Clean Energy and Pulse Clean Energy, have announced major investment milestones in August 2025, securing a combined total of over £495 million to expand their Battery Energy Storage System (BESS) operations across the country.

Two leading UK-based energy firms, AMP Clean Energy and Pulse Clean Energy, have announced major investment milestones in August 2025, securing a combined total of over £495 million to expand their Battery Energy Storage System (BESS) operations across the country.

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the security and flexibility that will make our future energy system resilient and reliable. Effective use of.

NatPower UK has announced plans to invest more than £10 billion in delivering a large-scale portfolio of battery energy storage and grid projects across the United Kingdom, marking a major investment in the country's energy infrastructure sector. The company is currently developing 13 battery.

Two leading UK-based energy firms, AMP Clean Energy and Pulse Clean Energy, have announced major investment milestones in August 2025, securing a combined total of over £495 million to expand their Battery Energy Storage System (BESS) operations across the country. These investments signal growing.

The UK energy storage market is proving attractive to investors, but more due diligence is required to maximise revenues. A large number of investors are seeking opportunities in the UK energy storage market, new research indicates. Data published by RenewableUK just over two weeks ago showed that.

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. The UK had 3,096MW of capacity in 2022 and this is expected to rise to 13,000MW by

2030. Listed below are the five largest energy storage projects by capacity in.

NatPower UK, a subsidiary of the NatPower Group, has unveiled plans to invest £10 billion (US\$12.8 billion) in the UK battery energy storage sector by 2040. This massive investment aims to bring online over 60GWh of capacity, marking a significant step towards a cleaner and more sustainable energy.
