

## ContainerPower Energy Solutions

# Tunisia Industrial-Grade solar Energy Storage Power Station

## Overview

---

Nestled in Tunisia's sun-drenched Sousse region, the Sousse Photovoltaic Energy Storage Power Station stands as a game-changer. Imagine solar panels dancing with advanced batteries – that's exactly how this hybrid system tackles energy challenges while reducing carbon footprints.

Nestled in Tunisia's sun-drenched Sousse region, the Sousse Photovoltaic Energy Storage Power Station stands as a game-changer. Imagine solar panels dancing with advanced batteries – that's exactly how this hybrid system tackles energy challenges while reducing carbon footprints.

Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022. State power utility company STEG The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer.

Nestled in Tunisia's sun-drenched Sousse region, the Sousse Photovoltaic Energy Storage Power Station stands as a game-changer. Imagine solar panels dancing with advanced batteries – that's exactly how this hybrid system tackles energy challenges while reducing carbon footprints. But why should.

### How Big Is the Generator of the Sousse Energy Storage Power Station?

The Sousse Energy Storage Power Station in Tunisia features a 50 MW/100 MWh generator capacity, making it one of North Africa's largest battery storage installations. This hybrid system combines lithium-ion batteries with solar.

The largest photovoltaic project in Tunisia's industrial sector is nearing completion in the Bir Mcherga industrial zone in Zaghouan. According to project officials, the unit is scheduled to begin operations in February 2026, marking a major milestone in the country's energy transition toward.

Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power. Highlights. Huge expandable capacity - expandable 2,016 Wh capacity battery power station, link 2-extra batteries to get a

massive 6,048 Wh; More than a solar generator, charge with AC, solar, car or the.

Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022. Following the landmark agreement with Saudi Electricity Company (SEC) in early 2025 for the world's largest 12.5GWh grid-side energy storage project.
