Vietnam local solar module prices

Overview

For households, a 3 kWp system typically costs 35–45 million VND, while a 10 kWp system ranges between 90–150 million VND. Large-scale commercial installations are more cost-effective, at around 8–10 million VND/kWp.

For households, a 3 kWp system typically costs 35–45 million VND, while a 10 kWp system ranges between 90–150 million VND. Large-scale commercial installations are more cost-effective, at around 8–10 million VND/kWp.

The prices of solar panels in Vietnam are subject to fluctuations based on different time periods and government regulations regarding the installation and deployment of solar power systems. At any given time, solar panels may cost anywhere from a few hundred thousand to several million Vietnamese.

This article provides comprehensive analysis of solar panel prices in 2025, from detailed price tables by brand to profitability analysis, helping you make accurate and most effective investment decisions. The global solar panel market is experiencing strong growth. Vietnam is currently one of the.

On average, Vietnam receives 1,700 to 2,500 hours of sunshine per year. Region-wise average sunshine hours in Vietnam are as follows. 1 The average PV output for solar in Vietnam is about 3.6 kWh/kWp per day, totaling approximately 1,314 kWh/kWp per year. 2 Vietnam Electricity (EVN) set the.

Explore a detailed comparison table of the most popular solar panel brands today. Learn about efficiency, price, warranty, and tips for making the right choice. Contact 0968 68 8081 now for a free installation consultation! 1. What is a Solar Panel?

A solar panel is a device that absorbs sunlight.

Vietnamese-manufactured solar panels are renowned for being cost-competitive—priced 8–12% lower than Chinese equivalents and 25–30% cheaper than European or American alternatives, while maintaining similar international quality standards. Specifically, high-quality monocrystalline panels cost.

Incorporated in May 2006, Allesun New Energy is a company that specializes in making solar cells and solar modules, with current capacities being 300mw for solar cells and 500mw for solar modules. The company has its headquarters in San Jose, U.S.A., but it also owns two marketing or sales. How much do solar panels cost in Vietnam?

Solar panel costs in Vietnam have declined steadily, following global trends while maintaining competitive advantages. Average pricing for high-quality monocrystalline panels decreased from \$0.34 per watt in 2022 to \$0.28 per watt in 2024, with further reductions anticipated as production scales increase.

Does Vietnam have a solar panel market?

Vietnamese solar panel production capacity has grown from 2.5 GW in 2019 to an impressive 18.7 GW by 2024, representing a 648% increase in just five years. This remarkable growth has positioned Vietnam as the fourth-largest solar panel exporter globally, capturing approximately 12% of the worldwide market share.

What is the growth rate of the Vietnam solar panel industry?

This represents a compound annual growth rate (CAGR) of 7.87% from 2025 to 2033. This article delves into various aspects of the Vietnam solar panel industry, including its current trends, drivers of growth, market segmentation, and competitive landscape.

What are the different types of solar panels used in Vietnam?

The Vietnam solar panel market can be segmented into several categories based on types of panels used and end-use applications: Cristal Silicon: The most predominant type due to its high efficiency. Monocrystalline Silicon: Known for better performance under low light conditions.

What is the competitive environment in the Vietnamese solar panel market?

The competitive environment within the Vietnamese solar panel market features several prominent players who are driving innovation and development efforts: Crysol Solar Cell Joint Stock Company: A key player focusing on high-efficiency products tailored for diverse applications. Green Wing Solar Technology Co., Ltd.:

What is Vietnam's solar manufacturing ecosystem?

Vietnam's solar manufacturing ecosystem encompasses everything from raw material processing to complete solar panel system assembly, supported by both international corporations and innovative domestic companies. The Vietnamese solar landscape features a diverse mix of established international brands and rapidly growing domestic manufacturers.
