What are the equipment of electric energy storage vehicles

Overview

There are four primary types of electric vehicle energy storage systems: batteries, ultracapacitors (UCs), flywheels, and fuel cells.

There are four primary types of electric vehicle energy storage systems: batteries, ultracapacitors (UCs), flywheels, and fuel cells.

The success of electric vehicles depends upon their Energy Storage Systems. The Energy Storage System can be a Fuel Cell, Supercapacitor, or battery. Each system has its advantages and disadvantages. A fuel cell works as an electrochemical cell that generates electricity for driving vehicles.
