What are the new energy storage power stations in Grenada

Overview

The funds will be used to install a 10.6-megawatt battery energy storage system, upgrade Grenada's transmission infrastructure, and integrate the country's first utility-scale solar power plant—capable of generating 15.1 megawatts of clean energy.

The funds will be used to install a 10.6-megawatt battery energy storage system, upgrade Grenada's transmission infrastructure, and integrate the country's first utility-scale solar power plant—capable of generating 15.1 megawatts of clean energy.

In a major step toward a greener future, the Government of Grenada has signed two landmark agreements with Grenada Electricity Services Limited (GRENLEC) to implement The Caribbean Efficient and Green-Energy Buildings Project. On Friday, August 15th Finance Minister Dennis Cornwall signed two.

On 21 st March 2025, PURC and RMI formalised their collaboration by signing a Memorandum of Understanding (MOU) for a project referred to as the Grenada Renewable Energy Project. This marks a major milestone in Grenada's clean energy transition, with the project set to deliver the island's first.

Grenada Electricity Services (Grenlec) is seeking consultants to support the development of a solar-plus-storage project at Maurice Bishop International Airport, featuring a 15.1 MW solar farm and a 10.6 MW / 21.2 MWh battery energy storage system. The World Bank and Caribbean Development Bank will.

The energy regulator of Grenada is seeking expressions of interest (EOI) for a solar or solar-plus-storage project at the Caribbean island nation's main international airport. The country's Public Utilities Regulatory Commission (PURC) has issued an early market engagement (EME) announcement.

That's where new energy storage systems come in - they're not just batteries, they're the island's ticket to energy independence. Wait, no - it's not just about throwing batteries at the problem. Grenada's 2023 National Energy

Policy update mandates 60% renewable penetration by 2030. To hit that.

A major new initiative aimed at transforming the Caribbean's energy sector has been launched, with the approval of the Caribbean Resilient Renewable Energy Infrastructure Investment Facility by the World Bank. The \$110 million facility will support clean energy development in Grenada, Saint Lucia.
