# What is the new project of energy storage

## Overview

---

MINNEAPOLIS (Nov. 3, 2025) — Xcel Energy plans to build the Midwest's largest battery energy storage site at the Sherco Energy Hub in central Minnesota.

MINNEAPOLIS (Nov. 3, 2025) — Xcel Energy plans to build the Midwest's largest battery energy storage site at the Sherco Energy Hub in central Minnesota.

Fullmark Energy quietly shuttered Swiftsure, a planned 650-megawatt energy storage system on Staten Island. The biggest battery project in New York has been canceled in a major victory for the nascent nationwide grassroots movement against energy storage development. It's still a mystery why.

Researchers have created a more energy dense storage material for iron-based batteries. The breakthrough could also improve applications in MRI technology and magnetic levitation. When three becomes five. Eder Lomeli, Edward Mu, and Hari Ramachandran (front row, from left) led an international team.

MINNEAPOLIS (Nov. 3, 2025) — Xcel Energy plans to build the Midwest's largest battery energy storage site at the Sherco Energy Hub in central Minnesota. The project is among a series of investments that will strengthen the region's energy security and expand the company's investment at Sherco and. What is New York's first bulk energy storage request for proposals?

New York Gov. Kathy Hochul has launched New York's first bulk energy storage request for proposals (RFP), intended to procure 1 GW of bulk energy storage as part of New York's 6-GW energy storage roadmap. An energy storage project in Hubbardston, New York. (Credit: Greg M. Cooper/Borrego).

What is New York's energy storage roadmap?

New York's 6-GW Energy Storage Roadmap also authorizes funds for NYSERDA to support 200 MW of new residential-scale energy storage and 1,500 MW of new commercial and community-scale energy. Additionally, at least 35% of

the benefits of these new energy storage projects will be allocated to disadvantaged communities.

How will state energy storage programs impact energy storage growth?

With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 GW of energy storage deployed by 2030.

Why is energy storage important in New York?

New York State Department of Environmental Conservation Commissioner Amanda Lefton said, “Energy storage is fundamental to help ensure reliability while New York continues to invest in renewables and reduce greenhouse gas emissions that are polluting our air and negatively impacting quality of life for New Yorkers.

What is New York's 6 GW energy storage roadmap?

New York’s 6 GW Energy Storage Roadmap, which recommends the deployment of six GW of energy storage, also authorizes funds for NYSERDA to support 200 megawatts (MW) of new residential-scale energy storage and 1,500 MW of new commercial and community-scale energy.

What is bulk energy storage & how can it help New York?

New York Secretary of State Walter Mosley said, “In looking ahead for the state's future, bulk energy storage can provide the ability to store excess electricity during times of lower usage or high renewable production and return that electricity to the grid during peak times when it’s needed most.
