What is the price of lithium energy storage power supply in Pakistan

Overview

In 2025, lithium battery prices in Pakistan range from PKR 15,000 to PKR 300,000, depending on type, brand, and capacity. How much does a lithium battery cost in Pakistan?

With more households and businesses shifting to solar energy and backup power, the demand for lithium batteries in Pakistan is growing rapidly. The price of lithium batteries in Pakistan ranges from PKR 15,000 to PKR 300,000 in 2025, depending on the type, capacity, and brand. Several key factors influence the cost of lithium batteries in Pakistan:

Are lithium batteries a viable energy storage solution in Pakistan?

Lithium batteries in Pakistan are gaining popularity as a reliable and efficient energy storage solution. With advancements in technology and the increasing demand for renewable energy sources, lithium batteries offer a sustainable option for storing electricity generated from solar panels or other renewable sources.

What happened to lithium batteries in Pakistan in 2024?

2024: The downward trend continued, with lithium carbonate prices dropping from around \$70,000 per metric ton to well below \$15,000. This decline further reduced battery pack prices, making lithium batteries more affordable in the Pakistani market.

Can lithium be extended into Pakistan?

Some people successfully worked out its extension into Pakistan. The present writer has collected some stream concentrate samples, both from up and down streams of the Tarbela area and got its XRF analysis confirming lithium both up and down stream. Now it has become a big story purely from an exploration point of view.

Where to buy lithium batteries in India?

Saddar Market (Karachi): Known for a diverse range of electronic goods, this market offers lithium batteries suitable for different applications. Montgomery Road (Lahore): Hosts several shops specializing in power solutions, including lithium batteries for UPS and solar systems.

Why invest in Pak lithium?

The company maintains 100% interest in the PAK Lithium Project which contains one of North America's highest-grade, large tonnage hard-rock lithium resources in the form of a rare low-iron spodumene. The Project has significant upside exploration potential.
