Progresiva, a subsidiary of Kontrolmatik Technologies, is set to embark on Türkiye's largest grid-scale energy storage project in Tekirdağ. This groundbreaking facility will be the first of its kind in Türkiye, boasting a GWh capacity. Moreover, it will be accompanied by the launch of a wind energy.

Türkiye is making significant strides toward its 2053 net-zero carbon emissions goal by ramping up investments in energy storage systems according to Türkiye daily. The Energy Market Regulatory Authority (EMRA) approved a 35-gigawatt-hour (GWh) capacity allocation for grid-scale storage projects.

Türkiye, with an electric power generation capacity of approximately 105 GW, is Europe's sixth-largest electricity market and the 14th largest in the world. Approximately 56% of Türkiye's electric power generation capacity consist of renewable energy, including hydroelectric, wind, solar.

Turkey's leading lithium-ion and energy storage manufacturer, Kontrolmatik Technologies, has inked a significant deal with Chinese energy firm Harbin Electric to deploy a groundbreaking 1GWh energy storage project within Turkey. The project, with an estimated investment of US\$300 million, will be.

The signatures were signed for Turkey's first GW-level electricity storage facility established by Kontrolmatik. China's state-owned Harbin Electric International Company (HEI) will provide a loan of USD 300 million for the first phase energy storage facility and will carry out the work on a.

According to Embassy of the Republic of Turkey, Turkey has introduced a number of incentives and regulations to achieve its goal of 80 gigawatt-hours (GWh) of energy storage by 2030, while agreements for the energy sector to set up cell and battery factories have exceeded \$1 billion (TL 35 billion).
