

## ContainerPower Energy Solutions

# Zinc-bromine long-lasting flow battery

## Overview

---

A zinc-bromine battery is a system that uses the reaction between metal and to produce , with an composed of an aqueous solution of . Zinc has long been used as the negative electrode of . It is a widely available, relatively inexpensive metal. It is rather stable in contact with neutral and alkaline aqueous solutions. For this reason, it is used today in and primaries.

Zinc-bromine flow batteries use zinc and bromine to store energy effectively. These innovative batteries use liquids that help store and release energy, making them ideal for various applications, from homes to large grid setups.
